

Testcase	Result	Comment
Content Provider (SQLite) tests:		
testInserts() sub-test 1	PASSED! Returned no exceptions.	Inserts one Drink into the table: "DrinkTable" by using the Content Provider.
testInserts() sub-test 2	PASSED! Returned one row from table.	"DrinkTable" should contain only one Drink.
testInserts() sub-test 3	PASSED! Returned no exceptions.	Moves to the first record with cursor. Should point to the first and only row.
testInserts() sub-test 4	PASSED! Returned correct data.	Check if all data in the entry is correct.
testInserts() sub-test 5	PASSED! Returned an exception.	Try to insert a row that already exists. Should return an exception.
testDeletes() sub-test 1	PASSED! Returned zero rows deleted.	Try to delete an empty record.
testDeletes() sub-test 2	PASSED! Returned one row deleted.	Delete an existing record.
testDeletes() sub-test 3	PASSED! Query and check that cursor.getCount returns zero.	Check if the row was actually deleted.
testUpdates() sub-test 1	PASSED! Returned zero rows updated.	Try to update an empty record.
testUpdates() sub-test 2	PASSED! Returned one row updated.	Update an existing record.
Robotium GUI tests:		
test1StartApplication	PASSED!	Checks if the right activity starts up at application launch
test2ChangeTabToCollection	PASSED!	Tries to change tab to the collection tab
test3OpenAddSpiritsButton	PASSED!	Tries to open the Add Spirits button
test4OpenSettingsButton	PASSED!	Tries to open the Settings activity
test5OpenAboutBox	Passes but test doesnt assert as it should.	Tries to open the About box, this test isnt fully implemented.
test6CheckMemory	PASSED!	Checks so that the memory on the device is still sufficient
test7OpenDrink	PASSED!	Tries to open a drink and sees so that the right activity starts.
