

We have chosen the Open Source license BSD. There are many advantages by using the BSD-license, we can put in other BSD-code in our app, we can use the free version of Git-hub and we can publish the app to Google Play when it is finished (and charge one USD for it). In the future we also have the ability to “close” the project and not distribute the source code.

This code is the license we put in the licensed Java files.

```
