

# Copyright and licensing

We decided to use the Open Source license BSD. There are many advantages to using the BSD-license over other licenses. Some of these include: recycling third party features in our app, using the free version of Git-hub, and publishing the app to Google Play (should we decide to) when it is finished, and turn a profit out of it. In the future we also have the ability to “close-source” the project and to not distribute the newly developed source code.

The following code is the licensing agreement placed in all of our classes.

```
