

Definition of Done

This document contains the requirements for our application to be considered completed.

Level one – Story DoD

- Code
 - Rule compliant code.
 - License information should be included in all class files.
 - Sufficient commenting for non-self-explanatory code.
 - Test the application on Android versions 4.0 and above.
 - Test the application on more than 3 different devices.
 - Test the GUI according to User Stories.
 - Remove unnecessary code.
 - All external data dependences have to be accessible.
 - All code should be committed to a branch.
 - All finished branches should be merged into the master branch.
- Testing
 - Passed all JUnit tests.
 - Test the application on Android versions 4.0 and above.
 - Test the application on more than 3 different devices.
 - All external data dependences have to be accessible.
- Documentation
 - The application features should be well documented.
 - Bugs and limitations should be published.
 - The Change Log should be published.
 - The Development Introduction should be sufficient for programmers to join our project.
