Release procedure

These tasks need to be done before a new release:

- Update version-name and version-code in Android Manifest
- Update version-number in 'About'
- Update the document "Release notes"
- Update the document "Known Bugs and Limitations"
- Update the list of features
- Test the project so there are no errors/warnings
- Tag release in GitHub-repo
- Upload release to Google Play (only version 1.0 and newer)
